

Super Laser Hair Removal (SHR)

SHR works by gradually heating the dermis to a temperature that effectively damages the hair follicles and prevents re-growth, while avoiding injury to the surrounding tissue. A high repetition rate of short pulses are delivered deep into the dermis, achieving high average power and therapeutically effective heat build-up, with virtually no pain.

How is SHR different from IPL/Laser hair removal?

IPL is painful because the whole band of unfocused light hits the skin, with a lot of useless energy causing heat damage and pain while trying to reach the hair follicles. SHR™ uses low energy levels, therefore it is painless as compared to IPL hair removal or Laser Hair Removal even on Brazilian bikini area.

All our SHR treatments starts with a full consultation and a patch test. During this consultation we will assess whether this treatment is suitable for you as well as determine a personal prescribed treatment plan which will give you the best results.

All our therapists are fully qualified Laser Specialists and are licensed to treat clients using advanced IPL/Laser equipment .The SHR system has been FDA certified for hair removal.
